

WHAT IS CLAIMED IS:

1. A storage pallet comprising a structure with an encapsulated tube-shaped structure or frame member geometrically arranged and a plurality of supports to increase the lifting capacity to the center of the geometric form, and a plurality of plugs or heels that can be of different geometric forms to provide stability to the pallet and of diverse thicknesses to support loads including of several tons.
2. The storage pallet of the Claim 1 wherein the tube-shaped structure or frame member includes supports as reinforcement members in order to give more support capacity to the pallet.
3. The storage pallet of the Claim 1 wherein the plugs or heels can vary of height with respect to the floor allowing the use of the pallet in different types of cranes or freight elevators.
4. The storage pallet of the Claim 1 wherein the pallet can be adjusted to support different loads depending of the encapsulated frame member, of the reinforcement supports and of the polyethylene foam.
5. The storage pallet of the Claim 1 wherein it is possible to personalize it with encapsulated prints and in different colors.
6. The storage pallet of the Claim 1 wherein the frame member can be made of steel or any other kind of material and any shape to provide resistance to the pallet.
